DARREL JACKSON

FULL-STACK SOFTWARE ENGINEER | CLOUD & DATA SYSTEMS

Houston, TX • (832) 439-8834 • darreljackson.dj@gmail.com • linkedin.com/in/darrel-jackson-706302202

PROFESSIONAL SUMMARY

Full-stack software engineer with four years of experience building, modernizing, and supporting production web applications and internal business systems. Delivered customer-facing portals, self-service workflow tools, API-integrated applications, and SQL-backed platforms, including a data-access redesign that cut report processing from about one hour to under one minute. Works across front end, backend, data, and production support using JavaScript, React, Node.js, Python, C#, ColdFusion, SQL Server, and Azure.

TECHNICAL PROFILE

Job Experience — The Service Center: ColdFusion, JavaScript, jQuery, AJAX, HTML, CSS, SQL Server, T-SQL, IIS, Cloudflare, RESTful APIs

College Coursework — Texas Tech: C#, Python, Java, C, C++, Node.js, MongoDB, ReactJS

Cloud: Microsoft Azure

Tools & Production: Git, GitHub, Bitbucket, Jira, Postman, Figma, IIS, Cloudflare, production support

PROFESSIONAL EXPERIENCE

Full-Stack Developer — The Service Center, Ltd. | Houston, TX **May 2022 – July 2026**

- **Modernized a legacy production platform:** Rebuilt an early-2000s customer interface into a contemporary web experience while preserving existing business logic and data workflows.
- **Reduced report processing time by more than 98%:** Reworked SQL queries and backend data access for tens of thousands of records, cutting customer-service report time from about one hour to under one minute.
- **Built reusable self-service tools:** Developed an internal application that let nontechnical teams configure promotional launches, product data, schedules, and copy without developer support.
- **Reduced engineering escalations:** Created customer-service tools for correcting customer records and product selections when third-party API integrations failed.
- **Owned customer-facing and internal platforms:** Developed and supported a rebate submission and status system, including customer tracking and internal access to current and historical claims.
- **Protected production releases:** Supported time-sensitive promotional launches, monitored live systems, diagnosed defects, and resolved issues before customer deadlines.
- **Delivered business applications across several use cases:** Built inventory, campaign, form-intake, file-upload, confirmation, and status-tracking tools for internal users and external customers.

EDUCATION

Texas Tech University — Bachelor of Science in Computer Science | Graduated May 2022
Programmer — FIRST Robotics Club | 2018
